

FOOD SAFETY FOR KIDS

- We make sure that the food you eat has no nasty germs in it so you do not get ill.
- We make sure that the places you visit are safe so you do not get hurt.
- We stop people smoking inside the places you visit so you do not have to breathe in the smoke.
- We make sure grown ups are safe in the places where they go to work.
- We get rid of horrible rats, mice and creepy crawlies in your house.
- We try to improve how healthy the food is when you are at school or when you go out for dinner.

We also work with lots of other people, for example the Police, Firefighters and Doctors, to help you keep healthy and safe.

Why not visit the Food Safety Team for more information at <http://www.bracknell-forest.gov.uk/environment/env-environmental-health/env-food-and-drink.htm>

"Yum, germs and stuff"

Just like germs could be hidden anywhere, Grubeye has hidden a load of words in this word search. They go up, down, diagonal, forwards, and even backwards! Can you find them?

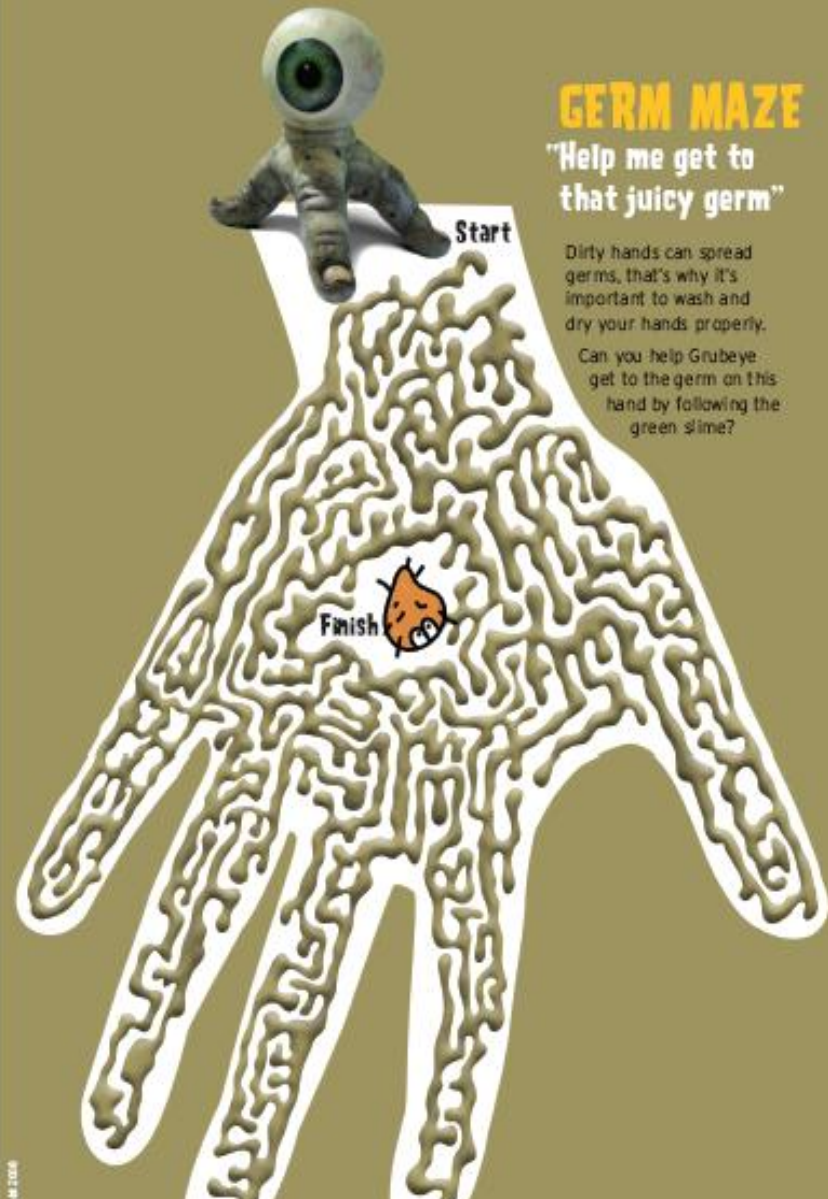

GERM MAZE

"Help me get to that juicy germ"

Dirty hands can spread germs, that's why it's important to wash and dry your hands properly.

Can you help Grubeye get to the germ on this hand by following the green slime?

Can you identify all the hazards in this picture?
